

Upland Brewery Project Survey

1. Were you successful in answering the question, “What is the concentration of X in the beer samples?”
2. What were the two most important things you learned?
3. Did you approach laboratory work differently because the class was working on a project for the Upland Brewery? If so, how?
4. How did you feel working on an experiment that did not have a known outcome and involved troubleshooting?
5. What was the most interesting aspect of the project?
6. What was the least interesting aspect?
7. What was the most difficult part of the project for you?
8. What could be improved if the project is done again?
