

A316 Final Project
Peer Evaluation of Project Contributions

Directions:

1. Write the names of your group members in the boxes.
2. Evaluate each person's contributions as a percentage of total effort for each area. The percentage must add up to 100% for each row.

Criteria	Your Name	Partner 1	Partner 2
Intellectual Contributions doing research, understanding the problem, developing procedures, understanding calculations, correct interpretation of data			
Lab Skills accurate preparation of solutions, proper use of instrumentation, effective experimental troubleshooting			
Preparation of Poster and Report Generating graphs and tables for presentation of data, writing text for poster or report, creating a visually appealing poster			
Teamwork Enthusiasm, positive approach to learning and problem solving, used time effectively both in and out of lab, attended meetings, upheld all aspects of the group contract			
Overall Contribution
