To use the LibreTexts within the new Equitable Access textbook program, you need to formally declare the textbook with the bookstore. This is done via the https://davis.verbacollect.com website. A video of almost completing the adoption can be viewed below (no sound). Sorry, your browser doesn't support embedded videos.

**Breakdown**

The breakdown of this seven-step process is below:

**Step 1**: Select the class that you are the instructor of record that you want to adopt a LibreTexts as the formal textbook.
**Step 2:** Select the section you want to Section that you are the instructor of record that you want to adopt a LibreTexts as the formal textbook.
Step 3: Confirm that you want to add text or material for this section.
**Step 4:** Since the LibreTexts is not formally into the system yet, you will need to add it manually. Select "Add Manually"

**Step 5:** Select "Add Supply /OER. The LibreTexts is OER (Open Educational Resource)

**Step 6:** Add in the three pieces of information

- **Description / Title:** Textbook

If you are selecting to use the LibreTexts Lab Manual or Homework system, indicate that instead.

- **Supplier / Creator:** LibreTexts
- **Link (URL):**

The link to your adopted text is to be added. For my Chem 110A class, this it:

Although, if the URL is not available, you can leave this blank.
Step 7: Confirm the Order

Step 8: Confirm the Order

Make sure you select “Required” for the first question. The other questions do not matter.
Step 9: Confirm the Order

Press the yellow button.

That's all folks. Contact Delmar Larsen (dlarsen@ucdavis.edu) for details on customization or other adoption issues. This whole process will go short cut to step 2 in future quarters.
