Design and Logic in the Biosynthesis and Total Synthesis of Natural Products

- Front Matter
- 1: Some Principles of Synthetic Planning
- 2: Sugars - Biosynthetic Starting Materials
- 3: Fatty Acids and Prostaglandins
4: Terpenes

5: Polyketides

6: Amino Acids and Alkaloids
Ancillary Materials

- Back Matter

Thumbnail: Ball-and-stick model of a prednisolone molecule, \(\text{CSD entry JIWPEL01}\), as found in the crystal structure available as CSD entry JIWPEL01. (Public Domain; Ben Mills via Wikipedia)
