A secondary (2°) ammonium salt is the salt formed in the acid-base reaction of a secondary amine with an acid.

eg:

```
CH₃
CH₂—N⁺ —+ H——Cl ————> CH₃
      H             H Cl⁻
```

2° amine               2° amine salt

see also secondary ammonium ion, primary ammonium salt, tertiary ammonium salt, quaternary ammonium salt
