• Front Matter

• 1: Introduction to Analytical Chemistry

• 2: Basic Tools of Analytical Chemistry

• 3: The Vocabulary of Analytical Chemistry
4: Evaluating Analytical Data

\[ r_2 = (y_2 - \hat{y}_2) \]

\[ r_1 = (y_1 - \hat{y}_1) \]

5: Standardizing Analytical Methods

6: Equilibrium Chemistry

7: Collecting and Preparing Samples
8: Gravimetric Methods

9: Titrimetric Methods

10: Spectroscopic Methods

11: Electrochemical Methods
12: Chromatographic & Electrophoretic Methods

- 13: Kinetic Methods

- 14: Developing a Standard Method

- 15: Quality Assurance
