*Introductory Chemistry Online* is an open-source introductory chemistry textbook/workbook that is designed to cover a college-level one-semester course. Many contemporary textbooks in chemistry seem to have adopted the notion that "more is better"; the books are long, expensive, and the pages are often cluttered with interesting tidbits and restatements of what it is that you have "just learned". The Chemistry Online text, on the other extreme, is designed to be simple, uncluttered and very much to the point.

- 1: Measurements and Atomic Structure
- 2: The Physical and Chemical Properties of Matter
- 3: Chemical Bonding and Nomenclature
- 4: The Mole and Measurements in Chemistry
• 5: Chemical Reactions

• 6: Quantitative Relationships in Chemistry

• 7: Aqueous Solutions

• 8: Acids, Bases and pH
• 10: Principles of Chemical Equilibrium

• 11: Nuclear Chemistry

• Front Matter
